SUMMARY

Cloud-native Infrastructure Engineer with a Master's in Computer Science and deep expertise in AWS, Terraform, and DevSecOps. Proven track record of architecting resilient CI/CD pipelines, optimizing backend performance using FastAPI, and enforcing cost governance (FinOps). Specialist in infrastructure automation, container orchestration, and eliminating configuration drift for scalable.

WORK EXPERIENCE

Sequaretek Pvt. Ltd.

February 2026 - Present

Cloud Deployment Engineer

Princeton, NJ

- Spearheading the phased deployment of Percept EDR across a complex multi-tenant Azure cloud infrastructure, serving as the primary technical anchor for client integration.
- Orchestrated secure network communication by configuring firewall rules and establishing IPsec tunnels between client Azure environments and centralized management servers.
- Executed targeted staging and manual validation on 15+ servers, ensuring agent compatibility and system stability prior to scaling deployment.

Sequaretek Pvt. Ltd.

June 2024 - August 2024

DevOps Intern

Andheri, India

- Provisioned scalable AWS environments (EC2, S3, IAM) via Terraform to support the backend infrastructure for Percept XDR, reducing provisioning time by 30% through reusable modules.
- Engineered automated build-and-deploy workflows in GitHub Actions for Percept XDR microservices, cutting release latency by 40% and eliminating manual intervention errors.
- Slashed cloud infrastructure costs by 10% by enforcing strict resource tagging strategies and identifying idle instances for termination.

Cognologix

June 2022 - May 2023

Software & Cloud Engineer Team

Remote

- Optimized high-traffic REST APIs using FastAPI and PostgreSQL, improving data retrieval speeds by 30% for data-heavy client applications via query indexing.
- Streamlined release cycles by architecting CI/CD pipelines in GitHub Actions, integrating automated unit testing and coverage reports to ensure code quality standards.
- Eliminated configuration drift across staging and production environments by containerizing legacy applications using Docker and orchestrating deployments on AWS.

PROJECT EXPERIENCE

Independent Projects

Data Hygiene Toolkit - Cloud-Native Data Validation Platform

August 2025 – January 2025

- Engineered a full-stack data hygiene platform using FastAPI, Next.js, and PostgreSQL, featuring 8 validator types, rule templates, and batch validation with memory-optimized chunking for datasets exceeding 1M rows.
- Automated infrastructure provisioning and deployment through Terraform and GitHub Actions, achieving instant rollbacks, multi-environment parity, and unified MinIO/GCS storage management.

Automated Infrastructure Provisioner - AWS Terraform + Ansible

February 2025 - April 2025

- Built an Automated Infrastructure Framework (IaC) using Terraform and Ansible to provision secure AWS environments (VPC, EC2, networking), integrating server hardening and CloudWatch monitoring.
- Established DevSecOps workflows with CI/CD integration and Makefile automation, designed to reduce setup effort by 60% through reusable templates and standardized tagging.

SKILLS

Cloud & DevOps: AWS (EC2, S3, IAM, Lambda, VPC), Terraform, Docker, Linux, GitHub Actions, CI/CD Pipelines.

Infrastructure & Automation: Ansible, Bash, PowerShell, Infrastructure-as-Code (IaC), Monitoring & Incident Response.

Programming & Databases: Python, FastAPI, REST APIs, PostgreSQL, MySQL.

Monitoring & Observability: AWS CloudWatch, Grafana, Log Management, Performance Metrics.

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate.
- ISO/IEC 27001:2022 Lead Auditor - BSI Training.

EDUCATION

Syracuse University - *Master's in Computer Science*

August 2023 - May 2025, Syracuse, NY

University of Mumbai - *Bachelor's in Computer Engineering*

August 2019 - May 2023, Thane, India
