EDUCATION

Syracuse University - College of Engineering & Computer Science, Syracuse, NY
Master of Science in Computer Science

August 2023 – Present

- Relevant Coursework: Intro to AI, DBMS, Operating Science, DAA, IoT security, CA.

New Horizon Institute of Technology & Management - Thane, India
Bachelors in Computer Engineering

August 2019 – May 2023

EXPERIENCE

Intern - DevOps Team, Sequaretek It – Andheri, IN

Jun 2024 – Aug 2024

- Engaged in Kubernetes-based deployments, contributing to scaling 100+ containers to assure high availability and optimal performance.
- Designed and optimized CI/CD pipelines in Jenkins, automating workflows and decreasing deployment time by 30%.
- Automated 10+ recurring tasks using Bash scripting and Python, streamlining operations and revising efficiency.
- Implemented Infrastructure-as-Code with Terraform and Ansible, achieving 95% consistency in cloud infrastructure deployments.

Intern - VAPT Team, Sequaretek It – Andheri, IN

Jan 2022 – Dec 2022

- Conducted vulnerability assessments and penetration testing on 15+ web applications, mobile apps, and networks.
- Utilized Burp Suite, Kali Linux, Nmap, Acunetix, Netsparker, and Nessus for manual and automated security testing.
- Managed incident response and containment of 5+ security incidents, reducing impact.
- Identified and reported 20+ vulnerabilities, including XSS, SQL injection, and mis-configurations, ensuring compliance with security best practices.
- Created 15+ detailed security reports for senior stakeholders, outlining risks and mitigation strategies.

PROJECT

AI-Powered Log Analyzer

Mar 2025 – Mar 2025

- Developed a real-time log analyzing system using Docker Compose, Elasticsearch, Kibana, and Grafana, handling 1000+ logs/sec.
- Built an anomaly detection service in Python, cutting down manual log review time by 60% with computerized analysis.
- Created Kibana & Grafana dashboards, enhancing incident response efficiency for large-scale log data.

InsightBot - The AI chatbot for university

Sep 2024 – Sep 2024

- Developed an AI chatbot using Python and Flask with NLP-based query handling for real-time interactions.
- Designed for scalability and integration with APIs to improve functionality and ensure platform compatibility.
- Optimized query processing by implementing advanced algorithms and techniques to revise accuracy, reduce response time, and ensure efficient handling of a wide range of queries.

Social Media Influencer Analysis for Business Marketing

Jan 2024 – Apr 2024

- Carried out a data-driven analysis of influencer marketing strategies across TikTok, YouTube, and Instagram using TensorFlow neural networks.
- Assessed engagement metrics and discovered fake profiles, enhancing efficiency of influencer collaborations for business marketing.

CERTIFICATIONS

ISO/IEC 27001:2022 ISMS Lead Auditor, BSI Training Academy

May 2024 – May 2024

- Gained expertise in analyzing and assessing organizational security controls against international standards.
- Qualified to lead ISMS audit teams and conduct independent security compliance assessments.
- Certificate ID: ENR-01510183 (Valid through May 2029).

SKILLS

- Development & Cloud:** Java, Python, JavaScript/TypeScript (React, Next.js), Docker, Microservices, API Design.
- CI/CD & Automation:** GitHub Actions, Jenkins, Bash scripting, Terraform, Ansible.
- Data & Messaging:** Kafka, Elasticsearch.
- Monitoring & Security:** Prometheus, Grafana, Kibana, Web/Network Security (Burp Suite, Kali Linux, Nmap, OWASP Top 10).
