EDUCATION

Syracuse University

Masters in Computational & Informational Sciences

Relevant Coursework: Data Mining, AI, Operating Systems, DBMS, Algorithms, IoT Security, Intro to Data Science, Natural Language Processing.

Syracuse, NY

August 2023 – May 2025

New Horizon Institute of Technology & Management

Bachelors in Computer Engineering

Thane, India

August 2019 – May 2023

WORK EXPERIENCE

Cognologix Technologies Pvt. Ltd.

Software Engineer Team Intern

Remote

June 2022 - May 2023

- Contributed to backend development using Python and FastAPI; integrated over 10 secure REST APIs.
- Collaborated on CI workflow automation via GitHub Actions for streamlined deployment and testing.
- Assisted in AWS provisioning and monitoring (EC2, S3, Lambda, IAM), supporting tagging to reduce costs.
- Participated in PostgreSQL query tuning, improving performance by ~30% on data-heavy endpoints.
- Participated in sprint planning and code reviews to ensure delivery of scalable backend components.
- Supported documentation of API endpoints and deployment workflows to improve team onboarding.

Sequaretek Pvt. Ltd.

Vulnerability & Penetration Testing Team Intern

Andheri, India

June 2024 - August 2024

- Conducted vulnerability assessments across 15+ applications using Burp Suite and Kali Linux.
- Identified and documented 20+ vulnerabilities (XSS, SQLi, misconfigurations) with mitigation steps.
- Supported ISO 27001-aligned infrastructure audits and revalidation scans for compliance tracking.
- Collaborated with team to improve backend and network security posture.

PROJECT EXPERIENCE

Independent Projects

Data Hygiene Toolkit (In Progress)

Syracuse, NY

May 2025 - Present

- Building a modular data hygiene tool in FastAPI and PostgreSQL with 30+ validation and standardization rules.
- Designing Angular frontend with editable grid to improve efficiency of data validation and correction workflows.
- Integrating Power BI dashboards for rule-wise metrics, anomaly tracking, and export support (CSV, Excel, JSON).

InsightBot – AI-Powered University Chatbot

September 2022 - December 2022

- Built a Streamlit-based chatbot to help international students explore universities by budget, weather, and field.
- Used OpenAI API + ChromaDB to provide personalized, context-aware recommendations.
- Integrated OpenWeather API + cost/job data across 25+ states for decision support.

Dynamic Portfolio Website

August 2024 - December 2024

- Built responsive portfolio with Next.js, Tailwind CSS, and Framer Motion.
- Integrated server-side rendering and secure contact form using Resend API.

SKILLS

Languages: Python, Bash, TypeScript (basic)

Cloud & DevOps: AWS (EC2, S3, IAM, CloudWatch), Git, Docker, GitHub Actions, Linux

APIs & Backend: FastAPI, REST, PostgreSQL, MySQL

Frontend (Personal Use): React, Next.js, Tailwind CSS

Security & Compliance: Burp Suite, Nessus

CERTIFICATIONS

- ISO/IEC 27001:2022 Lead Auditor – BSI Training (Valid till May 2029).
- AWS Solutions Architect – Associate (In Progress).
- AWS Certified Cloud Practitioner – Udemy.
